# Ecology of Happiness

## BOOK PRESENTATION

by **Stefano Bartolini**, Assoc. Professor, Dept. of Political Economy and Statistics, University of Siena, Italy

**Time: 17 September, 14:00-16:00**

**Location: Building 1481-341**

### **How to reconcile economy, ecology and well-being.**

It is widely held that the ecological transition of the economy will cost sacrifices that will have a negative impact on our well-being. But is this really true? This book demonstrates that the key for building a sustainable economy is more, not less happiness: a manifesto of the political, social and economic changes possible to stop challenging nature, including human nature.

*Organized by Hagen Schulz-Forberg, International Studies*

*No registration - all are welcome*
