## ORGANISERS

Sue Wright, Co-Director of Centre for Higher Education Futures (CHEF) <https://dpu.au.dk/forskning/forskningsprogrammer/chef>

Heather Swanson, Director of Centre for Environmental Humanities (CEH) <https://ceh.au.dk/>

- **What might sustainable education mean in a Danish context?**
- **How might we operationalise it at AU?**

Building on a recent Circle U [report](#), this event will ask:

- How can education programmes more substantially integrate disciplinary knowledge with the skills and capabilities to use that knowledge to achieve change?
- What institutional structures would enable universities to better sustain and spread the innovative educational projects that growing numbers of students and academics are undertaking?

Activities will include a presentation by student-researchers and co-authors of the Circle U report, a panel discussion with university leaders, and presentations of sustainable education initiatives by students and academics in Denmark and abroad.
